

30 years in Australian and global shares

December 2016

Australian and global shares

\$10,000 growth over the past 30 years to 31 December 2016, logarithmic scale

Source: Morningstar Direct. All returns shown are in AUD terms (assuming currency exposure is unhedged) and assumes dividends are reinvested. Returns are average annual returns over the periods shown. Indices used are: Australian shares: S&P/ASX 200 All Ordinaries TR, Global shares: MSCI World Index NR. In the Australian and global shares chart, a semi logarithmic scale has been used to show the proportionate importance of fluctuations over the period. The base of the semi logarithmic scale is 8. Index performance does not take account of management costs, operational and transactional costs or tax. Index performance does not reflect the performance of any individual portfolio of stocks. Please remember past performance is not a guide to the future. Investments in overseas markets can be affected by currency exchange and this may affect the value of your investment.
